S PECIALTIE ${ }^{\text {TM }}$

- Superior Accuracy and Total Error Band
- Instrument Grade
- CE Compliant
- Compact
- Variety of Pressure Ports and Electrical Configurations
- Optional Stainless Steel Snubber
- Weatherproof
- Gage, Sealed, Absolute, Compound
- Quick Turnaround Configurations (2 Week Lead Time)

## DESCRIPTION

The instrument grade U5300 pressure transducers from the UltraStable line of MEAS, with their modular design, offer maximum flexibility for different configurations. This latest series features superior accuracy and total error band for demanding commercial and heavy industrial applications. This series is suitable for measurement of liquid or gas pressure, even for difficult media such as contaminated water, steam, and mildly corrosive fluids.

The wetted material is made of 316L stainless steel and the transducer's durability is excellent with no o-rings or organics exposed to the pressure media. The U5300 is weatherproof and exceeds the latest heavy industrial CE requirements including surge protection. The circuit is protected from reverse wiring at input and short circuit at output.

This product is geared to the OEM customer for low to mid volumes. MEAS stands ready to provide a custom design of the U5300 where the volume and application warrants. Additional configurations not listed are either available or possible. Please inquire for further information.

## FEATURES

## APPLICATIONS

- Heavy Industrial CE Approval
- $10 \mathrm{~V} / \mathrm{m}$ EMI Protection
- Reverse Polarity Protection on Input
- Short Circuit Protection on Output
- $\pm 0.1 \%$ Accuracy
- $\pm 0.5 \%$ Total Error Band
- Compact Outline
- $-40^{\circ} \mathrm{C}$ to $+125^{\circ} \mathrm{C}$ Operating Temperature
- Weatherproof
- Military/Aerospace Test Stands
- Automotive Test Stands
- Calibration Equipment
- High Accuracy Applications
- Stationary Motor Fuel Control
- High End Industrial Machinery

## STANDARD RANGES

For custom configurations, consult factory.

## Notes

Compensated Temperature: The temperature range over which the product will produce an output proportional to pressure within the specified performance limits.
Operating Temperature: The temperature range over which the product will produce an output proportional to pressure but may not remain within the specified performance limits.
Storage Temperature: The temperature range over which the product can be stored safely in occasions without pressure applied or power input and remains rated performance. Beyond this temperature range may cause permanent damage to the product.
All configurations are built with supply voltage reverse and output short-circuit protections.

## CE Compliance

## EN 55022 Emissions Class A \& B

IEC 61000-4-2 Electrostatic Discharge Immunity ( 8 kV contact/15kV air)
IEC 61000-4-3 Radiated, Radio-Frequency Electromagnetic Field Immunity ( $10 \mathrm{~V} / \mathrm{m}, 80 \mathrm{M}-1 \mathrm{GHz}$ )
IEC 61000-4-4 Electrical Fast Transient Immunity (1kV)
IEC 61000-4-5 Surge Immunity (V+ to V-: $\pm 2 \mathrm{KV} / 42 \Omega$; L to Case: $\pm 1 \mathrm{KV} / 12 \Omega$; V- to $\mathrm{V}_{0}: \pm 1 \mathrm{KV} / 42 \Omega$ )
IEC 61000-4-6 Immunity to Conducted Disturbances Induced by Radio Frequency
Fields (150K~80MHz, 10V level for voltage output models, 3V level for current output model)
IEC 61000-4-9 Pulse Magnetic Field Immunity (100A/m peak)
For all CE compliance tests, max allowed output deviation $\pm 1.5 \%$ F.S.

U5300 Industrial Pressure Transducer

Note: Transmitter of gage pressure type requires vent to atmosphere on the pressure reference side. This is accomplished via cable from the transmitter (the end of the cable should be terminated to clean and dry area) or through the customer mating connector/cable assembly which has internal vent path.

WEATHERPROOF

| WEATHER-PROOF RATING |  |
| :---: | :---: |
| CONNECTION | IP CODE |
| Bayonet | IP67 |
| Packard | IP66 |
| Cable | IP67 |
| 1/2NPT CONDUIT | IP67 |
| M12 | IP67 |
| AMP/TE | IP67 |
| FORM C | IP65 |
| FORM A | IP65 |
| Sumitomo | IP67 |

Note: Weatherproof ratings are met when the mating connectors are installed properly and the cable termination is to dry and clean area.
