PRESSURE TRANSDUCERS

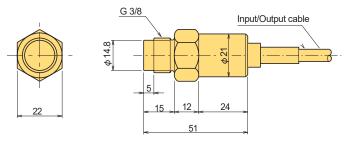

PWF-PB Flush Diaphragm type Pressure Transducer

1~50MPa

G3/8 size **High response**

Because this transducer has its pressure-receiving surface at the top of mounting screws, it is suitable for use in a situation where pressure changes dynamically. It is widely used to measure the pressure in pipelines, cylinder pressure, and so forth Protection ratings: IP67 equivalent

PWFC-PB Flush Diaphragm type Pressure Transducer 2~50MPa

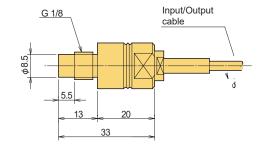

The PWFC-PB flush diaphragm pressure transducer is small in size and the screw used to mount it is also small G1/8 (PF1/8). The high responsiveness to changes in pressure makes this transducer most suitable for pressure control systems or pressure measurement in a confined space. It is widely used to control pressure in production lines, to measure cylinder pressure, and for many other applications.

Protection ratings: IP67 equivalent
