### DESCRIPTION

The model BST 58K1 is a uniaxial accelerometer based on variable capacitive technology with a good frequency response. The accelerometers are designed for relatively low amplitudes. It can be easily mounted with two screws. The sensor has 6 m very high rugged and flexible cable. This makes it easy to connect the sensor on data acquisition systems. It operates between 8 and 28 VDC unregulated. The sensor is available with a connector in the housing as well. This sensor has more possibilities for mounting. As an option, we supply the sensor with connector, Dallas ID or TEDS module. A calibration for the sensor is obligatory.

### DIMENSIONS

### SPECIFICATION ACCELEROMETER

All data are typical at 23 °C AND 10 VDC SUPPLY.
